

## SPECIAL REPORT

# What To Look For When Choosing A Landscape/Hardscape Contractor

- ✓ **Experience**  
Verify your contractor's experience before hiring them. Check that they have a degree in landscape design or architecture and the experience your project requires. Determine how long the company has been in business, check references, and request photos of completed work.
- ✓ **Communication**  
Communication is a very important factor. Contractors should return your phone calls in a timely fashion, keep appointments, and make sure you have a clear understanding of your project.
- ✓ **Price**  
The lowest price should not always be the deciding factor when choosing a contractor. Consider the contractor's experience and customer recommendations when making the final decision. Request quotes in writing, and remember to have the quote updated if any changes are made. When you do decide to work with a company, sign a contract detailing the project including start date and price.
- ✓ **Licensed and Insured**  
Check to be sure that any contractor you hire is licensed in your state and carries required insurance.

## Bonner Landscape Contractors
